Sep-2024 – Present

Phase 1,Hinjewadi,

Pune,Maharashtra,India

- Data Extract From Iceburg Format By Developing Mapping Script In SQL By Using Joins ,Views ,Case Statements,**Window** Function And CTE Tables.
- Involved in gathering the requirements, designing, development and Reviewing/Testing.
- Fully pipeline handled using Pyspark ,SQL And Shell Scripting.
- Strong Knowledge on Spark architecture and its integrations like **Spark SQL**, **Data Frames** and **Datasets API**.
- Handled Optimization techniques for long running jobs in **spark** and **hive**.
- Expertise in **Apache Spark & Python**.
- Good Knowledge Of Spark UI ,Transformations,Stages And Actions,And **Spark Architecture**.
- Writing the **Pyspark Script** And **SQL Script** For Raw Layer Data To **TDS** ,Tds to Eds and API Tables.
- Converting Raw Tables To Tds tables By Using SQL Script,Tds to Eds Tables By Conversion of **Mysql** Script(Stored procedure) To **Redshift** Sql scripts/**Pyspark** Script

- Working on **Amazon S3,Athena,EMR,Spark UI,Airflow Dags**,Creating The Dags By Using Config **JSON** File,Making **DDL** For Target,Temp Tables and Stored the data into Number Of Buckets And Partition
- Effective call management including logging, monitoring / updating, prioritizing and resolving calls .
- Involved in Partitions of Tables And Stored The Data Into **Pyspark** Buckets.
- Creating **Hive** tables to store the processed data in a tables.
- Developing logic of AWS glue Job using PySpark . Converting **CSV file to Parquet** file format. Uses of different **optimizations** Techniques Like **Broadcast** join,Cache,persist,repertition,Creating The Spark Sql Views.
- Use of Different Transformations (**Narrow/Wide**)By using Rdd and Spark Sql,Dataframes.

PROJECT : 02

Greenlam Industries

Data Engineer - Client, (wbc)Canada

Project name: western bank

Domain name: retail domain

Client : **Greenlam Industries** , India

Tools used : apache spark, sql ,hive , Pyspark, Shell Scripting,AWS

Sep 2023 – March 2024

Dehli,(Pune office)

- Propose improvements to current practices ensuring that approved enhancement are fully implemented and the repeat errors are eliminated.
- Development of Spark jobs for data transformations, data cleaning to later analyze Web application end users searching pattern and recommend proper products.
- Implemented the Spark framework for writing code in SQL/Python based tool, which will help to write code and build spark jobs.
- Handled Optimization techniques for long running jobs in spark and hive.
 - Conducted root Cause Analysis of bad data and queried approx. Like **duplicate records**.
 - Developing logic of AWS glue Job using PySpark. In developed logic we are **removing duplicates records** and converting file format. Converting **CSV file to Parquet** file format.
 - Used Of Different Optimization Technique Like Broadcast Join,Cache,Persist,Repertition.

PROJECT : 03 SARAG SYSTEMS, HYDERABAD

Data Engineer - Client, (wbc)Canada

Project name: western bank

Domain : banking

Client : western bank, Canada
